International Journal of Games and Social Impact (IJGSI)

Author Guidelines

As part of the submission process, authors are required to check off their submission's compliance with all of the following items, and submissions may be returned to authors that do not adhere to these guidelines.

The International Journal of Games and Social Impact is published in English.

The submission is original and not previously published and the text must respect the minimum length of 6000 words, the maximum length of 8000 words, and other formatting guidelines (the word count includes references, captions, and all other document contents).

1. The submission must be sent to glow@ulusofona.pt

2. The manuscript file in the e-mail submission needs to be anonymized. The manuscript should not have any reference to the authors or the institution they belong to. The authors must ensure that their manuscripts are prepared in such a way that they do not reveal their identities to reviewers, either directly or indirectly:

    a) File properties should not contain author-related information;

    b) The authors of the document should delete their names from the text, and replace them with placeholders such as [author]. The same procedure should be adopted for any information related to author or affiliation, e.g. replace the name of a project by [project].

3. All submissions will be selected by double-blind peer review. The author must provide in separate files:

    a) The title page should include the title, author name and affiliations, email address, acknowledgments (optional), conflict of interest statement (if necessary) and authorship statements. The author should ensure the anonymized manuscript is correctly prepared for double-blind peer review, by removing any kind of identification or affiliation. The author's name, profile, ranking, and institutional affiliation should only be mentioned on the title page. Revised articles will also be treated confidentially

until the date of their publication.

b) Attachments: Manuscripts may be accompanied by attachment files. In the case of materials produced by others, these are accepted under the condition that all applicable permissions were obtained by the author(s). Attachments should be numbered in order of appearance in the article. Images should be in JPEG, GIF, PNG, or TIFF format. The authors should not supply images files that are too low in resolution as disproportionately large for the content.

4. Formatting

a) Standard formatting of 12-point font, 1.5-spaced, Times New Roman, 2.54 cm (1.0 inch) margins should be used throughout. The use of italics is preferred to underlining. Notes should be converted to footnotes. Page numbers should be added on the top right corner (header) on every page;

b) Title Page formatting (roman alphabet – English):

Title: it should be written in Times New Roman 12, italics, bold, upper case, justified. It should not be longer than two lines. Should there be quotes or other expressions that justify it, they should always appear between straight quotation marks. The authors should avoid abbreviations and formulae where possible.

Sub-title (optional): should there be a sub-title, it should be written in Times New Roman 12, italics, bold, upper case, justified. It should not be longer than two lines. Should there be quotes or other expressions that justify it, they should always appear between straight quotation marks;

c) Abstract: under 300 words and under 1000 characters in standard formatting; d) Keywords: 5-7 keywords in Times New Roman 12, italics, single space, justified; e) Tables: the tables should be editable text and not as images;

f) Bibliography (roman alphabet – English): References should be formatted according to most current APA style; references should start on a new page, be double-spaced and subsequent lines should have a hanging indent of 1.25 cm (0.5 inches).

Hodent, C. (2017). *The Gamer's Brain: How Neuroscience and UX Can Impact Video Game Design*. CRC Press.

Lieberoth, A., Wellnitz, K. B., & Aagaard, J. (2015). Sex, violence and learning - Assessing game effects. In P. Lankoski & S. Björk (Eds.), *Game research methods* (pp. 175-192). ETC Press.

Toh, W. & Lim, F. V. (2020). Using Video Games for Learning: Developing a Metalanguage for Digital Play. *Games and Culture, 16*(5), 583-610. https://doi.org/10.1177%2F1555412020921339

In uncovered aspects, the manuscript must be formatted in accordance with the 7th edition of APA (Publication Manual of the American Psychological Association, see http://www.apastyle.org/).

Code of Conduct

Editorial Policies

The Editor and Editorial Board are responsible for publishing the manuscripts, ensuring their scientific quality, and managing the submission and publication process within a reasonable time.

The Editorial Team's responsibilities are:

- upholding the journal's scientific standards and its typographic and production standards;
- encouraging scientific debate and discussion;
- aiding scientific publication and debate on emerging subjects of international interest;
- holding to standards of impartiality in managing the articles submitted for publication;
- maintaining confidentiality regarding the received manuscripts and their contents until such time as they may be published;
- protecting a culture of democratic discussion, difference of opinion, and the possibility of criticism of published works, where nevertheless the editors reserve the right to judge where this criticism is appropriate and substantiated.

Authorship

The authors are primarily responsible for their content and originality. Failure to comply with appropriate behavior may render the authorization for publication unfeasible. In the case of co-authorship, all authors should have contributed to the publication. All authors should take onboard or respond to comments and corrections suggested by the reviewers. The corresponding author should be clearly indicated.

Author contributions [1]

Authors should submit an author statement outlining their individual contributions to the paper with reference to relevant roles (some examples: conceptualization; methodology; writing - original draft; writing - review & editing). Authorship statements should be formatted with the names of authors first and the role(s) following at the bottom of the title page.

Sample author statement example:

Carla Sousa: Conceptualization, Methodology, Writing - Reviewing and Editing, **Filipe Luz**: Writing-Original draft. **Micaela Fonseca**: Validation, Writing - Reviewing and Editing. **Pedro Neves:** Writing - Reviewing and Editing.

Financing

If the research was publicly or privately funded, it should be mentioned in the conflict of interest statement.

Publication Ethics

IJGSI is committed to upholding the integrity of the academic record. The journal adheres to the international standards set in Wager & Kleinert (2011) .[1]

Plagiarism

IJGSI takes issues of copyright infringement, plagiarism, or other breaches of best practice in publication seriously. We seek to protect the rights of our authors and we always investigate claims of plagiarism or misuse of published articles. Equally, we seek to protect the reputation of the journal against malpractice. Submitted articles may be checked with

[1] Wager, E. & Kleinert, S. (2011). Responsible Research Publication: International Standards for Authors. T.Mayer T & N. Steneck (Eds.), *Promoting Research Integrity in a Global Environment* (pp 309-16). Imperial College Press/ World Scientific Publishing. https://doi.org/10.1142/8102

duplication-checking software. Where an article is found to have plagiarized other work or included third-party copyright material without permission or with insufficient acknowledgment, or where the authorship of the article is contested, we reserve the right to take action including, but not limited to: publishing an erratum or corrigendum (correction); retracting the article; taking up the matter with the head of department or dean of the author's institution and/or relevant academic bodies or societies; or taking appropriate legal action.

Prior Publication

The submission must be original, not previously published, and not under consideration by other publications. If the material has been previously published it is not generally acceptable for publication in IJGSI. However, there are certain circumstances where previously published material can be considered for publication. Please contact the Editor for further discussion.

All submissions will be selected by double-blind peer review. The author's name, profile, ranking, and institutional affiliation should only be mentioned in the appropriate file. Revised articles will also be treated confidentially until the date of their publication.

Upon article acceptable, the authors confer upon the IJGSI the right to index, in international networks, the published articles. The content of the texts and the opinions expressed therein, as well as the reference to figures or graphics already published, are the sole responsibility of the authors.

Favorable reviewer opinion and feedback does not automatically entail a submission being accepted for publication. Acceptance is predicated on IJGSI editorial policy and the number of acceptable articles submitted to that issue of the journal. If the article is not published within one year, the author may submit it to other publications after giving prior notice to IJGSI management.

The Editor's final decision can be one of the four following categories: "Accept as is", "Minor Revision", "Major Revision", "Decline". The revised article will usually be returned to initial referees for re-evaluation in a second round of review.

Claims

Whenever the authors consider it pertinent, they are entitled to submit their complaints to the publishers. The process will be addressed by letter to the editors. Publishers shall undertake to respond to all complaints submitted.

Conflicts of Interest

The Committee on Publication Ethics (COPE) states in its Guidelines on Good Publication Practice (2003) that:

'Conflicts of interest arise when authors, reviewers, or editors have interests that are not fully apparent and that may influence their judgments on what is published.'

Conflict of interest may arise when academic and professional friendships exist with members of the IJGSI editorial team. In this situation, members of the editorial team will safeguard against the conflict of interest by handing review of the submission to external reviewers, while maintaining blind-review. By preserving author and reviewer anonymity, impartiality and intellectual independence are preserved as a right in scientific publication.

Data Protection

The Editors commit to guaranteeing protection of the confidentiality of individual information. The Editors require the same commitment from the authors of empirical research articles where appropriate, namely in the use of appropriate procedures for data protection and securing written consent to participation in studies from their subjects. Authors should comply with international ethical standards as well the ethical standards of their institutions.

Copyright Notice

Authors who publish with this journal agree to the following terms:

c) Authors are not required to pay any submission or processing charges. Under IJGSI's open access policy, all articles are openly accessible upon publication. Authors are permitted as well as encouraged to post their work online (e.g. in institutional repositories or on their website) prior to and during the submission process, as a means of encouraging earlier and wider citation, as well as fostering knowledge exchanges.

Privacy Statement

All personal data collected will be used exclusively for the services provided by this publication, and will not be made available to third parties.
